aero-check checklist template

v0.1.1 2024-09-12

TomVer99

https://github.com/TomVer99/Typst-checklist-template

This template allows you to easily create checklists in the style of aviation checklists.

Table of contents

Part I.
Usage

I.1. Pre Requisites

To use this template, to need to be able to compile typst documents.

I.2. Importing the template

There are two ways to import the template.

The first way is to download the template file and import it using the `#import` command with a relative path to the local file.

```Typst
#import "././aero-check.typ": *
```

The second way is to import the template from the Typst Universe. If you have a method to render Typst documents that supports the Typst Universe, you can import the template using the following command:

```Typst
#import "@preview/aero-check:0.1.1": *
```

I.3. First Document

To create a document using this template, you can use the `checklist` command.

This command has a lot of arguments to customize the document. Here is an example of a simple document:

```Typst
#show: checklist.with(
  title: "Title",
  // disclaimer: "",
  // 0 or 1
  // style: 0,
)

#topic("Topic")[
  #section("Section")[
    #step("Step", "Check")
    #step("Step", "Check")
  ]
  #section("Section")[
    #step("Step", "Check")
    #step("Step", "Check")
  ]
]
```
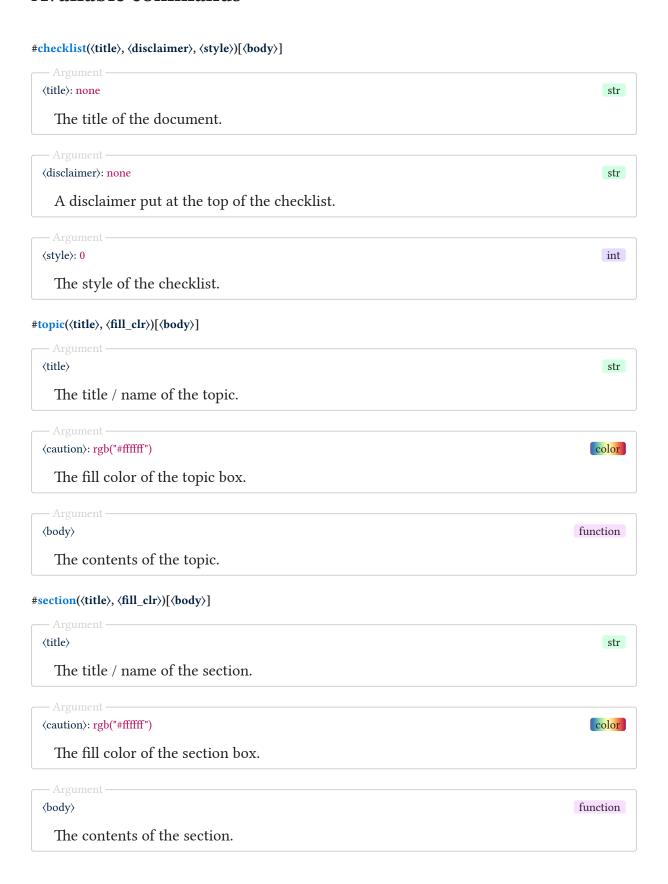

Part II.
Available commands

#checklist(⟨**title**⟩, ⟨**disclaimer**⟩, ⟨**style**⟩)[⟨**body**⟩]

---- Argument --
⟨title⟩: none   `str`

The title of the document.

---- Argument --
⟨disclaimer⟩: none   `str`

A disclaimer put at the top of the checklist.

---- Argument --
⟨style⟩: 0   `int`

The style of the checklist.

#topic(⟨**title**⟩, ⟨**fill_clr**⟩)[⟨**body**⟩]

---- Argument --
⟨title⟩   `str`

The title / name of the topic.

---- Argument --
⟨caution⟩: rgb("#ffffff")   `color`

The fill color of the topic box.

---- Argument --
⟨body⟩   `function`

The contents of the topic.

#section(⟨**title**⟩, ⟨**fill_clr**⟩)[⟨**body**⟩]

---- Argument --
⟨title⟩   `str`

The title / name of the section.

---- Argument --
⟨caution⟩: rgb("#ffffff")   `color`

The fill color of the section box.

---- Argument --
⟨body⟩   `function`

The contents of the section.

#**small_caution**()[⟨**caution**⟩]

> ┌─ Argument ───
> ⟨caution⟩   `str`
>
>   The caution text to be displayed.

#**emer-page**(⟨**black-and-white**⟩)[⟨**body**⟩]

> ┌─ Argument ───
> ⟨black-and-white⟩: false   `bool`
>
>   If the emergency page style should be drawn in black and white or color.

> ┌─ Argument ───
> ⟨body⟩   `function`
>
>   The contents of the emer-page.

#**small_caution**()[⟨**caution**⟩]
